# The Spirit of Our Work

*“It feels like there is an assumption that DL is the safer choice. But when campus closed, many of our most vulnerable students and families went dark - we had no eyes on them and minimal communications. DL addresses curriculum and academics but our schools are so much more than that - they are places of nutrition, mental health, mentoring and mandated reporting. Sometimes our campuses are the safest place for our students. We can control the school environment, based on science and best practices, and adapt as needed. Not every home environment is providing that level of stability, safety and responsiveness. I do believe that for some of our students, every minute they spend on campus is safer and better for them. And I do believe that educators are an essential business workforce.”*
